

Turn to the experts

2020 FALL TRAINING CLASSES

Due to concerns regarding the current Coronavirus situation, we will be switching from our in-person training and replacing them with live, remote webinars. These will be interactive and include PowerPoint and video presentations.

We will cover the Infinity System Touch Control, Greenspeed Heat Pumps, Heat Pump Troubleshooting, Basic Electric Controls and Troubleshooting, Ductless Split Systems and Small Rooftop Units.

Topics will include installation, control setup, electrical requirements, system troubleshooting, technical tips and best practices.

- 8 Person minimum required per class.
- Classes will not be scheduled until the minimum requirement is met.

2020 FALL TRAINING CLASSES

BASIC ROOFTOP SYSTEMS

4 FAD DISTRIBUTOR TRAINING HOURS

This class will cover models 48 & 50 TC, 48 & 50 HC, 48 & 50 GC, and 48 & 50 FC rooftop units with the latest factory design and updates, including the introduction of the EcoBlue supply fan, new controls and hardware, operation and troubleshooting review, startup, setup, VFD review, service procedures and economizer review.

WEBINAR

HEAT PUMP TROUBLESHOOTING

4 FAD DISTRIBUTOR TRAINING HOURS

In this class we will be working with Puron equipment, going over installation practices, longline applications, startup procedures, electrical troubleshooting, refrigeration cycle troubleshooting, controls, and factory updates. We will also cover why compressors fail, complete with internal pictures..

WEBINAR

INFINITY TOUCH CONTROL CLASS

2 FAD DISTRIBUTOR TRAINING HOURS

This training reviews Carrier's Infinity User Interface (UI) residential control. The goal is to explain the different test procedures and application conditions for peak performance. The latest factory updates relating to condensing units and codes will also be discussed.

WEBINAR

DUCTLESS TROUBLESHOOTING

4 FAD DISTRIBUTOR TRAINING HOURS

A comprehensive class containing multimedia, and demonstrations. Students will learn and take away knowing: equipment types, theory, current install practices and precision troubleshooting. Maximum capacity for this class is 20 students.

WEBINAR

BASIC ELECTRICAL CONTROLS & TROUBLESHOOTING

4 FAD DISTRIBUTOR TRAINING HOURS

In this class we will cover the fundamentals of electrical theory and how it applies to electromechanical controls operation. We will also be reviewing wire diagrams, sequence of operation, symbol descriptions, and troubleshooting equipment failures.

WEBINAR

NEW GREENSPEED HEAT PUMP 25VNA4 AND 24VNA6

2 FAD DISTRIBUTOR TRAINING HOURS

Training covers the 25 VNA high-efficiency heat pump with Greenspeed Intelligence. We cover controls, system operation, start-up, maintenance and troubleshooting. These heat pumps feature variable-speed rotary compressors driven by a variable speed drive. They use Infinity Touch communication controls for full variable-speed functionality, and are capable of setting up sub-cooling. They use an EXV in the heating mode.

WEBINAR

**DATES WILL BE DETERMINED ONCE AN 8 PERSON MINIMUM IS MET.
